

April 14, 2026

Dear Jinku Jung,

On behalf of Ohio Supercomputer Center's (OSC) annual summer OH-SCIPE project, congratulations on the award of an AI Research Experience (AIRE) Grant. We are excited to collaborate with you on this AI-focused research project. The grant provides a stipend of \$5,000 as compensation for your time. As a program participant, you will work as part of a university research team on an AI project for nine weeks, May 19th through July 20th, 2026.

After the completion of the following requirements, OSC will provide a total of \$5,000 to you in 5 installments over the course of 9 weeks.

- Completion of week 1 (May 26, 2026): \$1,000
- Completion of week 3 (June 9, 2026): \$1,000
- Completion of week 5 (June 23, 2026): \$1,000
- Completion of week 7 (July 7, 2026): \$1,000
- Completion of week 9 (July 21, 2026): \$1,000

Please be aware that you will be taxed on the stipend; OSU will send a 1099 tax form in January regarding taxes. The taxes will not be taken out of your payment but will be due when you submit your 2026 tax return.

You have been selected to participate in this project at OSC's discretion and committed to:

- Engage in on-site or hybrid standard working hours, ~36/week as confirmed by the science mentor.
- Learn about the computer software and systems required for the project.
- Follow the schedule below.

Week 1 (May 19-22) – in-person kickoff event, followed by virtual training: Python, Linux, HPC basics

Weeks 2-8 (May 26-July 10) – carry out project, meet regularly with science mentors, join CIP office hours

Week 9 (July 13-17) – project wrap-up, deliverables to science mentor, prepare presentations

July 20 – Virtual Wrap-up event with project presentations

Thank you for your participation in OSC's annual summer OH-SCIPE project and congratulations on your award!

Warm Regards,

Karen Tomko

Director of Research Software Applications

Ohio Supercomputer Center
