House_Flipper_School

A 3NF Database with the following tables:

Introduction:

Date	Event	Price
Nov 07, 2022	Sold	\$193,000
Nov 07, 2022	Pending	---
Nov 07, 2022	Price Changed	\$192,000
Nov 06, 2022	Price Changed	\$205,000
Nov 05, 2022	---	\$192,000
Aug 01, 2022	Listing	\$225,000
Nov 02, 2018	Listing Withdrawn	---
Apr 17, 2018	Listing	\$180,000
Apr 17, 2018	Listing Withdrawn	---
Mar 09, 2017	Listing	\$184,000
Mar 09, 2017	Listing Withdrawn	---
Aug 05, 2017	Price Changed	\$184,000
Jun 02, 2017	Listing	\$174,000
Jun 02, 2017	Listing Withdrawn	---
Apr 16, 2010	Listing Withdrawn	---
Aug 06, 2010	Listing	\$180,000
Aug 06, 2010	Listing Withdrawn	---
Apr 12, 2010	Listing Withdrawn	---
Feb 27, 2010	Listing	\$180,000
Apr 10, 2010	Listing Withdrawn	---
Nov 01, 2010	Listing	\$180,000
Nov 01, 2010	Listing Withdrawn	---
Aug 01, 2010	Listing Withdrawn	---
Aug 01, 2010	Listing	\$180,000

Many people are left with illiquid wealth from a living or deceased loved one but cannot convert a residential property to liquid wealth such as cash. Needs arise such as graduate school tuition, medical expenses for a loved one, or emergency loan default scenarios involving property liens. This database is a summary of all techniques used to sell the proverbial 1-story, 2200 square foot brick home circa 1948-1965 United States of America. The property I was charged with selling could not be sold, despite being listed on the market for over ten years through multiple real estate agents and price points.

Credit goes to my older brother and mother, David and Jemma Jung, who told me why it didn't sell and what they needed from the property's desired sale price point. With proper permissions, guidance Redfin of Cleveland's Joe Goldian, and some time, money, energy, and effort from myself, this old house finally sold. 4968 Columbia Road in North Olmsted, Ohio (postal code: 44070), bought for a 2008 purchase price of \$140,000 sold in 2022 for a sale price: \$193,000. This property flip for my Mom in profit was \$53,000. Mom's extra costs to sell the property? \$4,000 or less.

If you get a similar property thrown into your lap, I estimate it will only take 90 days or less of labor and promotion combined to convert a gifted property to a cash sale. My hope is for other people not to have to spend 10+ years trying to sell their home similar to mine. Use this guide and database of materials and techniques to help flip your own 1-story, 1148 square foot brick home.

Do It Yourself Courses to Teach You This Property Flip:

(see [homedepot.com](https://www.homedepot.com) website for the full course video with current prices)

Course 1: Repaint Indoor/Outdoor Area

Course 2: Replace Light Fixtures

Course 3: Use a Wood Floor Re-glosser

Course 4: Trim Tall Hedges and Shrubbery

Course 5: Mow Your Lawn

Course 6: Clean Your Gutters

Course 7: Prevent High Growth Weeds

Course 8: Prevent a Flooded Basement and/or Front Yard

Course 9: My Home is too Warm or Cold

Course 10: Upgrade Knob and Tube Home to GFCI Outlets and Paneling

Question 1:

Criteria:

“Create a database: show the statement used to create this database.”

Question 2:

Criteria:

Then, create tables (at least 5), with at least one many-to-many relationship table AND your tables structured in 3NF. Show your create tables SQL statements to appropriately document database table creation and linkage.

The screenshot shows the MySQL Workbench interface with the 'house_flipper_school' schema selected. The SQL editor contains the following code:

```

19
20 CREATE TABLE instructors
21 (
22     instructor_id INT PRIMARY KEY AUTO_INCREMENT,
23     instructor_name VARCHAR(80) NOT NULL,
24     instructor_phone_number VARCHAR(25) NOT NULL,
25     instructor_email_address VARCHAR(255) NOT NULL UNIQUE
26 );
27
28 CREATE TABLE students
29 (
30     student_id INT PRIMARY KEY AUTO_INCREMENT,
31     student_name VARCHAR(80) NOT NULL,
32     student_phone_number VARCHAR(25) NOT NULL,
33     student_email_address VARCHAR(255) NOT NULL UNIQUE
34 );
35
36 -- 2) Courses (references instructors; do NOT reference students directly in courses in 3NF)
37 CREATE TABLE courses

```

The screenshot shows the MySQL Workbench interface with the 'house_flipper_school' schema selected. The SQL editor contains the following code:

```

37 CREATE TABLE courses
38 (
39     course_id INT PRIMARY KEY AUTO_INCREMENT,
40     course_name VARCHAR(80) NOT NULL UNIQUE,
41     course_category VARCHAR(80) NOT NULL, -- fixed spelling: category
42     default_instructor_id INT NOT NULL,
43
44     CONSTRAINT courses_fk_instructors
45     FOREIGN KEY (default_instructor_id)
46     REFERENCES instructors (instructor_id)
47 );
48
49 -- 3) Materials (references suppliers)
50 CREATE TABLE materials
51 (
52     material_id INT PRIMARY KEY AUTO_INCREMENT,
53     material_description VARCHAR(200) NOT NULL UNIQUE,
54     supplier_id INT NOT NULL
55 );

```

Question 3: Populate Tables

Criteria:

- At least 5 rows in each table
- Utilize appropriate relationships 1. IE: If you have created a many to many between students and courses, make sure to have at least one student taking multiple courses and one course being taken by multiple students
- Show the **Select *** statement for each of your tables so that I can see your completed and populated table.

Course Materials Table:

The screenshot shows the MySQL Workbench interface with the 'course_materials' table selected in the Navigator. The 'Result Grid' displays the following data:

course_id	material_id	quantity	notes
1	1	1	\$24.99: paint brush, pan, roller, and cover included.
2	7	1	\$249.99: 20" diameter flush mount LED indoor light.
2	24	1	\$149.00: 159-piece socket, wrench, and screwdriver kit.
3	4	1	\$21.97: wood floor restorer.
4	2	1	\$499.00: cordless hedge and tree trimmer kit.
5	3	1	\$4100.00: gas powered riding lawn mower.
6	34	1	\$29.00: 12' Fiberglass Outdoor Ladder.
7	31	1	\$3.97: bag of black mulch.
7	32	1	\$30.97: concentrate weed killer solution.
8	27	1	\$218.65: 3/4 HP sump pump.
8	28	1	\$22.98: lye-based drain cleaner solution.
8	29	1	\$119.99: 35% hydrogen peroxide.
8	30	1	foam

Courses Table:

The screenshot shows the MySQL Workbench interface with the 'courses' table selected in the Navigator. The 'Result Grid' displays the following data:

course_id	course_name	course_category	default_instructor_id
1	Repaint Indoor/Outdoor Area	Aesthetic	1
2	Replace Light Fixtures	Aesthetic	2
3	Use a Wood Floor Reglosser	Aesthetic	1
4	Trim Tall Hedges and Shrubbery	Aesthetic	3
5	Mow Your Lawn	Aesthetic	3
6	Clean Your Gutters	Functional	1
7	Prevent High Growth Weeds	Functional	3
8	Prevent a Flooded Basement and/or Front Yard	Functional	4
9	My Home is too Warm or Cold	Functional	2
10	Upgrade Knob and Tube Wired Home to GFCI O...	Functional	2

Enrollments Table:

MySQL Workbench interface showing the Enrollments table data. The query executed is `SELECT * FROM house_flipper_school.enrollments;`. The result grid displays the following data:

course_id	student_id	enrolled_on
1	1	2026-05-01
1	5	2026-04-23
2	2	2026-04-13
2	4	2026-04-22
3	1	2026-04-16
3	3	2026-04-10
4	2	2026-05-01
4	4	2026-04-25
5	1	2026-04-28
5	3	2026-04-29
NULL	NULL	NULL

The left sidebar shows the SCHEMAS panel with the Tables list expanded, highlighting the Enrollments table. The Information panel shows details for the Enrollments table, including columns: `course_id` (int), `student_id` (int), and `enrolled_on` (datetime).

Instructors Table:

MySQL Workbench interface showing the Instructors table data. The query executed is `SELECT * FROM house_flipper_school.instructors;`. The result grid displays the following data:

instructor_id	instructor_name	instructor_phone_number	instructor_email_address
1	Jinku Jung	332-400-7347	longshot413@icloud.com
2	James Manges (Manges Electrical)	216-990-5089	manges.electric@icloud.com
3	Hall Brothers Landscaping	866-240-7992	RyanMHallBros@outlook.com
4	Sam Beason (Retired Ford Welder)	440-748-3955	sam.beason@icloud.com
5	Joe Goldian (Redfin)	216-224-9525	joe.goldian@redfin.com
NULL	NULL	NULL	NULL

The left sidebar shows the SCHEMAS panel with the Tables list expanded, highlighting the Instructors table. The Information panel shows details for the Instructors table, including columns: `instructor_id` (int), `instructor_name` (varchar), `instructor_phone_number` (int), and `instructor_email_address` (varchar).

Materials Table:

MySQL Workbench interface showing the query: `SELECT * FROM house_flipper_school.materials;`

The result grid displays the following data:

material_id	material_description	supplier_id	supplier_item	supplier_sku_number
1	Purdy Paint Roller Kit	2	paint roller kit	979334
2	Makita Battery Cordless Hedge...	1	cordless hedge trimmer kit	330949833
3	John Deere X330 Riding Mower	5	riding lawn mower	JDX33042
4	Rejuvenate Wood Floor Reglo...	1	wood floor reglosser	832967
5	3M Filtrette Furnace Filters	6	furnace air filter	20388253

Table: **courses**
Columns: **course_id**, **course_name**, **course_category**, **default_instructor_id**

Students Table:

MySQL Workbench interface showing the query: `SELECT * FROM house_flipper_school.students;`

The result grid displays the following data:

student_id	student_name	student_phone_number	student_email_address
1	Mary M.	216-524-4444	Mary.M@PizzaHut.com
2	George K.	216-931-1212	George.K@nws.gov
3	Mathias G.	440-871-4381	Mathias.G@hotmail.com
4	Marissa L.	440-777-7730	Marissa.L@fox.com
5	Kayleigh M.	216-779-6749	Kayleigh.M@foxnews.com
6	NULL	NULL	NULL

Table: **courses**
Columns: **course_id**, **course_name**, **course_category**, **default_instructor_id**

Suppliers Table:

The screenshot shows the MySQL Workbench interface. The top toolbar includes icons for file operations, editing, and database management. The left sidebar contains a 'SCHEMAS' panel with a tree view of tables: course_materials, courses, enrollments, instructors, materials, and students. The 'courses' table is selected, and its columns are listed: course_id (int), course_name (varchar), course_category (varchar), and default_instructor_id (int). The main query editor displays the SQL query: `SELECT * FROM house_flipper_school.suppliers;`. The 'Result Grid' shows the data for the 'suppliers' table, with columns: supplier_id, supplier_name, and supplier_website. The data is as follows:

supplier_id	supplier_name	supplier_website
1	Home Depot	homedepot.com
2	Lowes	lowes.com
3	Supply House	supplyhouse.com
4	Best Buy	bestbuy.com
5	Hartville Hardware	hartvillehardware.com
6	Walmart	walmart.com
7	Sherwin Williams Paint	sherwin-williams.com
8	Amazon	amazon.com

The bottom status bar indicates 'Query Completed'.

Question 8:

Criteria:

Create an event by adding several rows of information OR moving data from one table to an archive. Show your create event statement and use the show events statement to show the event you just created in the MySQL event scheduler.

Question 9:

Criteria:

Create a role to assign privileges. Then show your create role statement AND your grant privilege statement below.

The screenshot shows the MySQL Workbench interface. The left sidebar displays the 'SCHEMAS' panel with the 'house_flipper_school' database selected. The main editor window contains the following SQL script:

```

1  /* Name: Jinku Jung
2     * Date: May 3rd, 2026
3     * Class: IT 2351 Enterprise Data Systems
4     * Assignment: Final Project--House Flipper_School Database
5     * Question 9: Show events.
6     */
7  USE House_Flipper_School;
8  DROP ROLE IF EXISTS enrollment_clerk;
9  CREATE ROLE enrollment_clerk;
10 GRANT SELECT, INSERT, UPDATE ON House_Flipper_School.enrollments TO enrollment_clerk;
11 GRANT SELECT ON House_Flipper_School.students TO enrollment_clerk;
12 GRANT SELECT ON House_Flipper_School.courses TO enrollment_clerk;
13 SHOW GRANTS FOR enrollment_clerk;
  
```

Below the script, the 'Result Grid' is visible, showing the output of the 'SHOW GRANTS' statement:

Grants for enrollment_clerk@%
GRANT USAGE ON *.* TO 'enrollment_clerk' @...
GRANT SELECT ON 'house_flipper_school'. 'co...
GRANT SELECT, INSERT, UPDATE ON 'house_f...
GRANT SELECT ON 'house_flipper_school'. 'st...

The bottom status bar indicates 'Result 1' and 'Read Only'.

Question 10:

Criteria:

Create a role to assign privileges to assign at least one privilege to at least one role explicitly. Grant a password and establish password requirements. Then show your **CREATE USER** statement, **PASSWORD** requirements statement, **GRANT** privilege statement, and user role assign statement below.
